India's First: Elder Line (Toll Free No- 14567)

- India is expected to have nearly 20% elderly population i.e., over 300 million senior citizens by 2050. It is significant as many countries have a population less than this number. This age group faces various mental, emotional, financial, legal and physical challenges, and the pandemic has further exacerbated it. What is more important to understand is that this age group is a basket of

wisdom and untapped resource for the overall economic and social growth of the country.

- Taking cognizance of the growing need to support the elderlies in the country, the Government of India has taken a monumental step towards addressing the challenges and problems they face, through country's first Pan-India toll-free helpline – 14567 -- called 'Elder Line', which provides free information and guidance on pension issues, legal issues, extends emotional support, and even intervenes on field in cases of abuse, and rescues homeless elderly.
- The intent of 'Elder Line' is to provide all senior citizens, or their well-wishers, with ONE platform across the country to connect and share their concerns, get information and guidance on problems that they face on a day-to-day basis, without having to struggle for it.
