India Objects To WHO's Methodology

- India has objected to the World Health Organization (WHO) methodology for calculating COVID-19 death toll. In response to an article titled 'India Is Stalling the WHO's Efforts to Make Global Covid Death Toll Public' published by a US Daily, Union Health Ministry said, New Delhi has been in regular and in-depth

technical exchange with the WHO on the issue of collecting and making public the COVID-19 death toll in the country. It said the analysis while uses mortality figures directly obtained from Tier -I set of countries, uses a mathematical modelling process for Tier II countries which includes India.

- The Ministry added that India's basic objection has not been with the result but rather the methodology adopted for the same. It also said India has shared its concerns with the methodology along with the other Member States through a series of formal communications including six letters issued to WHO.

- During these exchanges, specific queries have been raised by India along with the other Member States regarding the methodology, and use of unofficial sets of data. The Ministry elaborated that the concern specifically includes on how the statistical model projects estimates for a country of geographical size and population of India and also fits in with other countries which have smaller population.

- Such one size fit all approach and models which are true for smaller countries like Tunisia may not be applicable to India with a population of 1.3 billion. WHO is yet to share the confidence interval for the present statistical model across various countries. It also said the model gives two highly different sets of excess mortality estimates of when using the data from Tier I countries and when using unverified data from 18 Indian States. Such wide variation in estimates raises concerns about validity and accuracy of such a modelling exercise.

- Rescue operations have been hampered by rain and unstable soil. The authorities said, more than three lakh residents had been forced to evacuate as of today.

- The disaster comes as the country is still recovering from a typhoon that tore through its central islands in December, killing more than 400 people.
