## Army Eyeing 350 Light Tanks for Ladakh And Sikkim

- The purchase of 350 light tanks, for use in the Himalayas and also in other areas, is under active discussion in the defence ministry. These tanks, likely to be about 25 tonnes are likely to be deployed, when ready, in Ladakh and parts of Sikkim, which are cold and barren plateaus and therefore, good tank country.
- In both areas, India is face to face with the Chinese People's Liberation Army. Currently, the Army uses T-72 tanks in these areas— they weigh about 42 tonnes. The Army has already issued a Request for Information and has made it clear that these tanks should be usable in areas where the temperature is low and also in Rajasthan and in areas where there is a lot of water.
- The light tanks will have a crew of two or three soldiers and, keeping in mind future warfare, will be able to use smart munitions. Importantly, they are expected to have the ability to fire at high angles— necessary for the mountains.
- The Army is also looking for Infantry combat vehicles as part of the modernisation process. These will have special features for commanders and the proposal is already before the Defence Acquisition Council, chaired by defence minister Rajnath Singh and including the three chiefs.
