India Pips UK to Become Fifth Biggest Economy

Our Bureau

New Delhi: India has overtaken the UK to become the world's fifth largest economy, calculations by Bloomberg showed.

The development, though it had been widely expected, is a significant milestone for the Indian economy given the history of two centuries of colonial rule. The last time India's GDP had been larger than Britain was in the early 1700s, before the commencement of British rule.

The International Monetary Fund (IMF) had earlier this year forecast that India would overtake the UK in the current year, ranking behind the US, China, Japan, and Germany. On an adjusted basis and using the dollar exchange rate on the last day of the relevant quarter, the size of the Indian economy in "nominal" cash terms in the quarter through March was \$854.7 billion. On the same basis, UK was \$806 billion, Bloomberg estimated using the IMF database and historic exchange rates.

Data released on Wednesday showed the Indian economy grew 3.5% in the April-June quarter, further extending its lead over the UK that saw its economy contract 0.1% in the quarter. In terms of current rupee prices, India's economy grew 26.7% while the UK's GDP was up 1% in local currency.
