39th Edition Of India-Indonesia Coordinated Patrol

- The 39th edition of India-Indonesia Coordinated Patrol (IND-INDO CORPAT) between the Indian Navy and the Indonesian Navy is being conducted from 08 – 19 December 2022. Indian Naval Ship (INS) Karmuk, an indigenously built Missile Corvette participated in the pre-deployment briefing at Belawan, Indonesia. The CORPAT will be executed along the International Maritime Boundary Line (IMBL) from 15 to 16 December 2022 and will conclude with a debrief at Port Blair. Along with INS Karmuk, L-58 (indigenously built Landing Craft Utility vessel) and Dornier Maritime Patrol Aircraft will be participating in the CORPAT. KRI Cut Nyak Dien, a Kapitan Pattimura Class Corvette, would represent the Indonesian side.
- As part of Government of India's vision SAGAR (Security And Growth for All in the Region), Indian Navy has been proactively engaging with countries in the Indian Ocean Region (IOR) to enhance maritime security in the region. India and Indonesia have been carrying out CORPATs twice a year since 2002, with an aim of keeping this vital part of the IOR safe and secure for commercial shipping, international trade and conduct of legitimate maritime activities. CORPATs help build understanding and interoperability between navies, and facilitate institution of measures to prevent and suppress Illegal Unreported Unregulated (IUU) fishing, drug trafficking, maritime terrorism, armed robbery and piracy. It further helps enhance the operational synergy by exchange of information for prevention of smuggling, illegal immigration and for conduct of Search and Rescue (SAR) operations at sea.
- India and Indonesia have traditionally enjoyed a close and friendly relationship covering a wide spectrum of activities and interactions. The 39th edition of IND-INDO CORPAT seeks to bolster the maritime cooperation between the two navies and forge strong bonds of friendship between India and Indonesia.

Russian Upgrade Of P-800 to 1000kms, Shows The Same Can Be Done With Brahmos

- Russia is planning to extend the range of its P-800 Onyx (SS-NX-26) missile to 1,000 kilometers. Indo-Russian BrahMos is based on the Russian P-800 Oniks supersonic anti-ship cruise missile that had a limited range of 290km to meet MTCR restrictions but since India joined the MTCR regime it has steadily increased its range from 290km to 450km.
- In 2017, India announced plans to increase the range of the missile to 800km by optimizing the cruise performance of the rocket's linear jet engine. India also had plans to increase its capped speed from Mach 2.8 to Mach 4.5 by upgrading the tech of the Ramjet engine.
- Brahmos is a widely tested Indian missile system that has developed many improved variants in the last two decades and as seen in the accidental launch into Pakistan it is still not easy to detect let alone be intercepted by the Air defense systems in the region.
