## SAMPANN Pension Portal Integrated with UMANG

- The SAMPANN pension portal has been integrated with the UMANG (Unified Mobile Application for New-age Governance) platform, allowing nearly 4 lakh pensioners of the Department of Telecommunications to access their PPO details and Life Certificate validity online.

- SAMPANN (System for Accounting and Management of Pension) is a flagship digital platform developed by the Office of the Controller General of Communication Accounts.
- Dedicated to the nation in December 2018, the system manages the entire pension lifecycle, from processing pension cases to disbursement and grievance redressal.
- With integration into UMANG, pensioners can now retrieve their Pension Payment Order (PPO) number and check Life Certificate (LC) validity status through a single digital platform.
- According to Ashish Joshi, Principal Controller of Communication Accounts, this integration enhances ease of access, transparency, and service efficiency.
- Combined with DigiLocker support, it ensures pensioners always have access to vital pension information on mobile or web platforms.
- Currently, two major SAMPANN services are available on UMANG.
- Pensioners can know their PPO number by entering their bank or post office account details along with date of birth.
- They can also check the Life Certificate validity date, which confirms whether their pension will continue without interruption.
- These services are especially useful for elderly pensioners, helping them avoid delays or stoppages due to missing documentation
